Staff Webinar | Introduction to Restructuring

**Thursday, 1 July 2021
2:30 P.M. – 3:30 P.M. EAT**

[Click Here to Join](#)

The DRRI Team is delighted to invite you to a brief training on restructuring in its entirety as well as elements of restructuring for a business and its relevance to our clients.

As you may be aware, restructuring is an action taken to significantly modify the structure or the operations of the company to increase the efficiency of its operations or where the company is facing significant operational difficulties or in financial distress. Some options used during restructuring involve the rearrangement or re-alignment of businesses and their structures to reduce operation costs and maximise the competitiveness and profitability of the business. The need for restructuring of various entities has recently been exaggerated during the pandemic occasioning the change of structure for several businesses to ensure profitability in the post-COVID world.

Restructuring involves various disciplines, including aspects relating to corporate and commercial law, employment, transfer of assets as well as banking and finance. We encourage you to attend this training to identify the different roles to be played by each team.

This training is intended to equip you with an understanding of the importance and purposes of restructuring, the options available concerning the restructuring of an entity, and the commercial risks to consider when undertaking to restructure.

We look forward to hosting you.
